Washington Association of Juvenile Court Administrators(WAJCA) and Administrative Office of Courts (AOC)

Start date: 1998
Type: Client server application
Assessment Instruments: Back on Track! Pre-Screen and Full Assessment

Assessments.com:

Experienced and Focused on Evidence-Based Practices

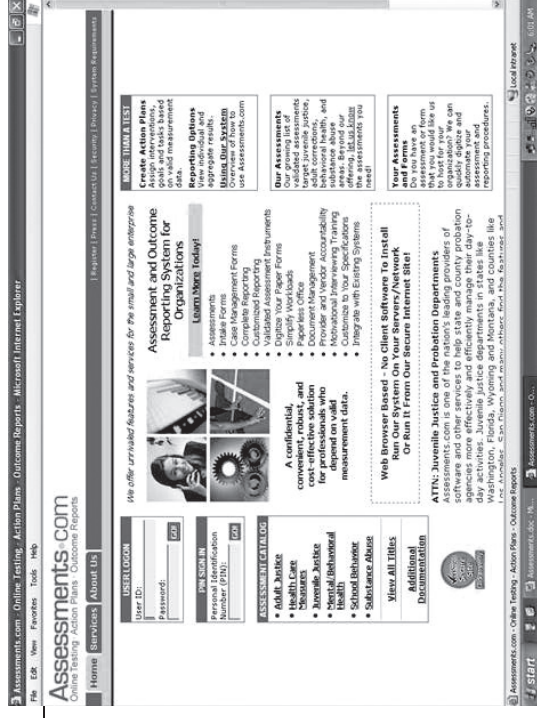

Assessments.com, also known as Allvest Information Services, was founded in 1998 to provide Risk and Needs Outcome Measurement software to the juvenile justice community. The company's first product, Back on Track!, which combined a validated risk and needs assessment instrument with automated outcome-based reporting features, was launched in Washington State in November, 1998.

During this initial implementation, Assessments.com was tasked with developing a validated risk assessment application, installing and implementing it statewide, and providing a comprehensive staff training program that focused on the theory and application of the assessment tool, effective case management principles, quality assurance programs and motivational interviewing skills.

Since then, Assessments.com has worked with many juvenile justice agencies, juvenile and family courts, community-based organizations and corrections departments across the United States. We have gained valuable experience working in more than a dozen states and more than a hundred counties. Our products, which have always been state of the art, remain the most solid and innovative in this field. We have a proven track record and are proud of the contributions we have made as partners with our clients.

Although we are still a small company, we have some of the largest and most progressive clients in the country - the states of Washington, Florida, Montana and Wyoming, and counties like Los Angeles and San Diego, to name just a few. We share with our clients a passion for what we do best - working collaboratively to reduce youth recidivism and helping turn lives around.

How do we do it? By implementing superior online assessment and case planning systems, and by working hard with our partners every step of the way to ensure that each and every process is rooted in best practices and

www.assessments.com

proven principles of effective intervention. That is the only way to get the outcomes our clients want, their jurisdictions need, and the youth and other offenders deserve.

We are committed to being innovation leaders in our industry and we will continue to deliver tools and resources such as Washington's Back on Track! and Florida's PACT (Positive Achievement Change Tool) and YES (Youth Empowered Success) automated case planning system that offer objective, affordable, accountable solutions for the treatment and rehabilitation of supervised and incarcerated offenders.

Assessments.com: Major Client Implementations by State

ALASKA

Alaska Department of Health and Social Services, Division of Juvenile Justice

Start date: 1998
Type: Client server application
Assessment instruments: Back on Track! Pre-Screen and Full Assessment

Other: Custom integration with Alaska's Juvenile Offender Management Information system (JOMIS), a product developed by Softec, a private company. Users able to move between the two applications seamlessly, working on the same juveniles and sharing and updating information automatically.

CALIFORNIA

Amador County Probation Department

Start date: 2005
Type: Web-hosted application
Assessment instruments: Risk and Resiliency Check-Up

Other: Implementation included training on risk assessment theory, case management and motivational interviewing.

Los Angeles County Probation Department

Start date: 2004
Type: Web-hosted application
Assessment instruments: Risk and Resiliency Check-Up

Other: Implementation includes license agreement authorizing up to a maximum of 1,600 users. Allvest Information Services, Inc. (dba Assessments.com) hosts the assessment and outcome measurement data on our own secure servers and delivers to the department and it's contract service providers, the same desktop software look and feel over the Internet as is otherwise made available in the Client server application.

Merced County Probation Department

Start date: 2002
Type: Client server application
Assessment instruments: Back on Track! Pre-Screen and Full Assessment

Other: Back on Track! is a validated online assessment instrument that includes risk and protective factors which are further delineated as either static or dynamic. Implementation included training for Probation Officers on risk assessment theory, case management and motivational interviewing.

Monterey County Probation Department

Start date: 2002
Type: Client server application
Assessment instruments: Back on Track! Pre-Screen and Full Assessment

Other: Implementation included development of a customized case planning module with delineation of service objectives and client responsibilities; also included training for Probation Officers on risk assessment theory, case management and motivational interviewing.

San Benito County Probation Department

Start date: 2004
Type: Client server application
Assessment instruments: Back on Track! Pre-Screen and Full Assessment

Other: In addition to the online, automated risk assessment instrument, implementation included a comprehensive, customized case management software package, with modules for action plans, chronological case notes, accounting/restitution, and outcome measurement reporting.

San Diego County Probation Department

Start date: 2003
Type: Web-hosted application
Assessment instruments: Risk and Resiliency Check-Up

Other: San Diego Probation, together with all of San Diego's community-based organizations, use the Assessments.com application over the Internet to administer a risk and resiliency factor assessment instrument that San Diego helped develop in partnership with Brad Bogue of J-SAT and Assessments.com.

San Mateo County Probation Department

Start date: 2003
Type: Client server application
Assessment instruments: Back on Track! Pre-Screen and Full Assessment

Other: Implementation included development of customized case planning module, as well as training for Probation Officers on risk assessment theory, case management and motivational interviewing.

Type: Client server application
Assessment instruments: Back on Track! Pre-Screen and Full Assessment

Other: Implementation included training for Probation Officers on risk assessment theory, case management and motivational interviewing.

Tuolumne County Probation Department

Start date: 2004
Type: Web-hosted application
Assessment instruments: Back on Track! Pre-Screen and Full Assessment

Other: Implementation included training for Probation Officers on risk assessment theory, case management and motivational interviewing.

COLORADO

Denver Mayor's Office of Drug Strategy

Start date: 2003
Type: Web-hosted application
Assessment instruments: Risk and Resiliency Check-Up

Other: Implementation in Denver with multiple agencies and service providers included training on risk assessment theory, case management and motivational interviewing.

FLORIDA

State of Florida, Department of Juvenile Justice

Start date: 2005
Type: Client server application
Assessment instruments: PACT (Positive Achievement Change Tool) Pre-Screen and Full Assessment YES Case Plan (Youth Empowered Success)

Other: Statewide implementation in Florida included consultation on development of PACT tool which is a Florida-customized derivation of the WA tool, Back on Track! The PACT incorporates sufficient mental health assessment to allow Florida to eliminate use of the MAYSJ-2. Implementation also included training on risk assessment theory, case management and motivational interviewing. Current activity includes development of the most advanced automated case planning system in use by juvenile justice today. Called the Youth Empowered Success (YES) case plan, this fully automated system helps court and probation staff prioritize a client's criminogenic needs, and then through behavioral objectives, links each need to specific goals, action items and report tracking.

Evidence Based Associates

Start date: 2005
Type: Web-hosted application
Assessment instruments: Back on Track! Pre-Screen and Full Assessment

Other: Implementation included training on risk assessment theory, case management and motivational interviewing.

IOWA

SiouxI and Human Investment Partnership (S.H.I.P.)

Start date: 2002
Type: Client server application.
Assessment instruments: Back on Track! Pre-Screen and Full Assessment

Other: Implemented as a multi-agency assessment and outcome measurement information system for S.H.I.P. In this implementation, Assessments.com enables the courts, probation department, schools, and social services agencies to collaborate and share case notes and case management reports among themselves in an effort to improve program efficacy along the continuum of care.
